MEMORANDUM FOR: USIB Secretariat

SUBJECT : USIB-D-41.14/217 dated 23 February 1965

1. GMAIC has responded to subject requirement in a memorandum to USIB. It is recognized that the question of priority for high resolution photography of Soviet orbiting and ballistic vehicles was not treated in detail in this response. The Committee feels that all requirements listed in the attachment to our memorandum have sufficient priority to justify collection effort. Relative priorities would be dependent on cost, operational considerations and other factors which are beyond the scope of the Committee study.

2. Should a division be made to develop one or more of the systems described in subject USIB document, priorities would be required for the operational use of such systems. The present USIB Committee structure should provide an appropriate mechanism for establishing priorities and tasking the collection systems.
